Fabrizio, you rock! and thanks for the lectures

HI

YOLO

Fabrizio, you are awesome!

Not the best textbook. Learned the most from the lectures and from doing the exercises.

the live coding in the lectures were very helpful

Good job bro

Fabrizio has been an amazing teacher :)

This has been the course I have looked forward to the most every day during the current semester.

The chapters we are suppose to read, arrive late. I would like to read the chapter before the lecture, so that I can keep up and have some understanding or grasp at what's going on. It would be nice to have some guide or hints for the exercises, like what kind of expression we are talking about. I believe it's better t give the student some tools before the student make the exercise complete out of the open.

I like the way the teacher pronounce 'A list of strings' <3

tchau bella!

Really loved this course, very good lecturer!

Fun and informative course.

I like the course alot, but there have been some lack in the communication regarding Pages to read prior to exercise classes (i dislike a lot the idea that we read during the exercise class itself)

The lectures are great, but it will be better to also have dias (such as PowerPoint) to make it easier for learning concurrency and to also make it a bit more organiased.

Overall, the course has been rather easy to follow and it didn't complicate thing.

More structure. Give people the ability to study ahead / from home, by putting up what to read weeks in advance.

One of the best lecturer by far - learned a lot from his lessons.

Loved the live coding in the course!
